NEW Loon Monitor

...CLEARLY there is nothing common about this Loon!

Made in Canada 

/ [totemacoustic.com](http://totemacoustic.com)

For nearly four decades, Totem Acoustic has been a world leader in combining the utmost in spatial restitution while maintaining an expansive, musically dynamic and involving sound field. This accurate, three-dimensional expansiveness and musical liquidity can be actually augmented via a smaller chassis design as we have proven through our storied history.

The NEW Totem LOON Monitor as its namesake implies, has an entrancing, hypnotic and mystical ability to transmit sound in a fluid and completely engaging manner. Like a Loon, transferring not only sound but a mysterious, sonic energy that endlessly engages... transferring deep emotion, speed and balance within a quasi-full range sound experience.

Simply listening seems to be not enough as the LOON echoes a sound we recognize as true and deep. Let the LOON thrust itself with full abandonment in your listening environment, devoid of any pretension except the pure joy of sonic bliss.

#### About Totem Acoustic

Created in 1987, Totem's mission is to develop loudspeakers capable of reproducing a truly involving performance. Our goal is to provide designs that are affordable, cosmetically timeless, and invoke an emotional response. Music, movies, TV, and video games are accurately rendered with a powerful focus that is yet soul stirring.
